

GCP WORDCOUNT HOMEWORK

HOMEWORK DESCRIPTION

- Run the Hadoop MapReduce WordCount Application on Google Cloud Platform.
- The WordCount code can be found on <https://hadoop.apache.org/docs/current/hadoop-mapreduce-client/hadoop-mapreduce-client-core/MapReduceTutorial.html>
- Update the Java code above to capture and display the time of execution for your application
 - Hint: You can use `System.currentTimeMillis()`

DELIVERABLES

- GitHub Repository URL. Your repository should contain the following:
 - Screenshot of your GCP Account (25%)
 - Make sure to show the name of your account in the Screenshot
 - The source code you used (25%)
 - A screenshot of the results of the execution of your code showing Execution Time (50%)

Your GitHub repository should be public
